

eco  spa

made for you

Choosing your hot tub has never been easier...

Introducing the EcoSpa hot tub range; Affordable, efficient, and feature-packed; designed to elevate relaxation and bring family and friends together.

With beneficial hydrotherapy massage, low running costs, an eco-conscious design, beautiful lighting options, and all standard with a Bluetooth surround sound; these hot

tubs have everything you need for enjoyment all year round. The EcoSpa hot tub range offers the perfect blend of relaxation, socialising, and fun. Unwind and soak in hot water, creating cherished moments and unforgettable experiences for everyone.

The EcoSpa hot tub range is meticulously hand-crafted to deliver the best value for

money spa experience, while prioritising minimal maintenance, low chemical consumption, energy efficiency, comfort, and relaxation.

Whether taking time out for yourself or connecting with friends, an EcoSpa is the choice of quality, reliability and excellence.

Eco Spas Automatic Self-Cleaning Spa Care System

All EcoSpa hot tubs feature the exclusive Clean Zone Self-Dosing System, allowing the water to be sanitised gradually using easy-to-use bromine cleaning cartridges.

This system helps to reduce maintenance and chemical consumption and prevents you overdosing your hot tub water. This is a chlorine free system; great for those who may have sensitive skin and find chlorine too strong.

How Does it Work?

A bromine cartridge is placed into the Clean Zone System which self doses the spa water. Bromine doesn't have a strong smell and does the same job as chlorine, sanitising the spa water keeping it safe for you and your family to use all year round. Bromine is also less corrosive than chlorine and salt systems.

Our Clean Zone technology is perfect for those with sensitive skin, who want the most chemical free and low maintenance system possible. The cartridges can be replaced easily just by twisting the cap to the Clean Zone system, pulling the cartridge holder out, discarding of the old cartridge and replacing with the new one.

The Clean Zone technology teamed with the Clear Zone Filtration system, make the EcoSpa hot tub range the perfect choice for complete value for money and relaxation. Designed with you in mind, to save you time, energy, and money.

What are the benefits of using the Clean Zone System?

- Less chemical consumption
- Very low maintenance
- Helps to prevent irritations
- Longer lasting water
- Easy to use
- Softer water by using minerals
- Reduces odours
- Crystal clear water
- 30% less corrosive

Owning a home hot tub gives you permanent access to the same beneficial effects of hot water enjoyed through the ages by the ancient Turks and Romans.

Better Health

A massaging hot tub reduces stress, stimulates blood circulation, eases muscle tension and soreness, gives temporary relief from arthritis and accelerates healing of muscle related injuries.

Arthritis / Sports Injury Relief

Hydrotherapy for just 10 to 15 minutes daily can significantly improve your body's co-ordination and flexibility. A warm aquatic environment facilitates blood flow through your body.

A hot tub's hydro massage jets target pain precisely. Jets in the footwell - for example - alleviate pain in your ankles and feet, while swirling jets installed in the back of a hot tub lounge seat ease tension in the back and neck.

Improved Sleep

After a hectic day, the soothing water of a hot tub can help melt away tension and let relaxation replace the stress of the day.

Get Social

Hot tubs are the perfect social hub for friends and family. A hot tub provides the perfect opportunity to relax and enjoy the outdoors! Imagine the enchantment of a clear summer sky or the soothing warm water surrounding you while the winter snow falls.

Talking, laughing, listening to favourite tunes and having family fun!

The Eco Spa Collection suits every lifestyle and features the very latest technology to help you maximise the pleasure of owning a hot tub. Our in-house staff are always available to advise before, during and after you choose your hot tub.

- Lights
- Waterfalls

EcoZone Insulation

Our award-winning concept involves 3 processes: we spray ½" Polyurethane Foam onto the back of the spa shell for insulation. Then, 3cm Polyurethane Foam Panels are fitted inside the frame of the cabinet. These 2 processes alone trap 90% of heat which travels through the shell.

Finally, we have a Polyisocyanurate Reflective Silver Foil Wrap fitted to the inside of the cabinet and another 1" Polyurethane Foam Panel on the inside of the Silver Foil.

EcoZone Insulation has an R-value of 18.45 and assures that your hot tub is fully insulated to be energy-efficient, resulting in low running costs.

Our EcoZone Insulation also complies with the Californian Energy Commission's recommended and controlled quality assured guidelines.

THE ECO DIFFERENCE

80% more effective than the average skimmer filtration system, Clear Zone technology provides external pressurized filtration where the filter is outside of the bathing area.

This provides cleaner, clearer water, less chemical consumption and maintenance, lower running costs and is ultimately more hygienic for all bathers.

This is a chlorine free inbuilt self-dosing system allowing the water to be sanitized gradually using easy to use water cleaning cartridges.

Clean Zone helps to reduce maintenance and chemical consumption and gives a bonus of softer water with no harsh chemical odour.

ECOTRANQUIL

The EcoTranquil 4-person hot tub features a versatile lounge offering head-to-toe hydrotherapy from either end, designed to accommodate all shapes and sizes.

With an extra 3 corner buckets seats for wrap around massage, this hot tub is the perfect intimate relaxation destination and great if space is a little limited. Enjoy advanced cleaning systems and an array of features for an unparalleled spa experience.
